EDUCATION

Sri Venkateswara College of Engineering 2024
Bachelor of Engineering in Mechatronics

2024

- Focus: Robotics, Artificial Intelligence, and Automotive Systems.
- Thesis: Real-Time Smart Home Surveillance System using Raspberry Pi.

WORK EXPERIENCE

Growbeyond Tech Pvt. Ltd.
Software Engineer

Oct 2024 – Dec 2025

- Supported execution of product roadmap across **Zoho-based enterprise platforms**, aligning with business and operational goals.
- Managed and prioritized **product backlog**, ensuring requirements were clear, actionable, and delivery-ready.
- Translated business requirements into **user stories with defined acceptance criteria** for engineering teams.
- Collaborated closely with engineering during **sprint planning, development, and delivery cycles** to resolve scope and implementation challenges.
- Led development of **AI-powered voice automation system** (Twilio + OpenAI + Zoho), reducing manual workload and improving operational efficiency.
- Built and deployed **35+ workflow automations** for CRM and operations, improving internal process efficiency
- Designed and executed **lead generation and analytics pipeline**, achieving 60%+ engagement rates through data-driven optimization.
- Conducted **product discovery sessions**, gathered user feedback, and validated workflows with stakeholders.
- Maintained structured documentation for **workflows, system processes, and product features** to support operational clarity.

Cyborg Sapient Pvt. Ltd.
Full Stack Developer

Sep 2022 – Oct 2022

- Contributed to development of **AI-driven CRM platform**, improving workflow efficiency and reducing manual effort by 50%
- Partnered with engineering to enhance system reliability and optimize performance

Antrasd Pvt. Ltd.
R&D Engineer

Jun 2022 – Jul 2022

- Developed **computer vision** models using TensorFlow and OpenCV, **improving processing efficiency by 20%**
- Collaborated with engineering teams** to validate model performance and resolve technical issues

Remark Skill
Web Developer

Oct 2021 – Nov 2021

- Developed a dynamic and interactive photography blog website, utilizing **HTML** and **CSS** to create a visually appealing and **user-friendly interface**.

Elskov Pvt. Ltd.
UI/UX Designer

Mar 2023 – Aug 2023

- Designed **wireframes** and **interaction flows** for consumer applications, improving usability and reducing iteration cycles.
- Collaborated with engineering teams to ensure **feasibility and alignment with technical constraints**.
- Contributed to product requirement discussions and feature design decisions

PROJECTS

AI-based Customer Support Chatbot

- Built LLM-powered chatbot using OpenAI and LangChain with vector database integration (Pinecone)
- Designed retrieval-based system for accurate and context-aware responses

Smart Home Surveillance System

- Developed real-time facial recognition system using Raspberry Pi and computer vision
- Implemented AI-based alerting system improving monitoring effectiveness

TECHNICAL SKILLS

Product Management: Agile (Scrum), User Stories, Requirement Gathering, Stakeholder Management, KPI Tracking, Product discovery, Jira, Customer research, data-driven decision making.

Zoho Ecosystem: Zoho One, Zoho CRM, Zoho Creator, Zoho PMS, Zoho Projects, Zoho people.

Automation & Tools: n8n, Make.com, Zapier, Zoho zia agents, Apify.

AI/ML: Generative AI, LLMs, NLP, TensorFlow, PyTorch, Openai platform.

Web & Tech: HTML, CSS, WordPress, Loveable ai, Supabase, Figma, Google Antigravity, AWS.

Digital Marketing: Google Ads, Meta Ads, SEO, GEO, Zoho Marketing Automation.

Analytics: GA4, Tag Manager, Zoho Analytics.

Soft Skills: Analytical Thinking, Client Communication, Leadership, Self-Learning, Time Management.
